

LOW COST MOLD FAST DELIVERY

The Rapi-Cast process bridges the gap between model shop fabrication and injection or compression molding. It is not intended to be a substitute. All that is required is a model of your part, made of any material. The Rapi-Cast process will reproduce your model in precise detail in selected plastic material best suited for the application.

'RAPI-CAST'

SHORT RUN PLASTIC MOLDING

- ♦ MOLDED THERMOPLASTICS
- ♦ ACCURACY BETTER THAN 1%
- ♦ TRANSPARENT, CLEAR OR OPAQUE
- ♦ REINFORCED & FLEXIBLE MATERIALS
- ♦ FAST DELIVERY

APPLICATION

Excellent method for market testing new products, salesman's samples in advance of production, short run to set up production line, product testing, replacement parts, low quantity production requirements, embedments, potting, etc.

ACCURACY

The Rapi-Cast process will reproduce a model part made of any material, reproducing precision and finest detail of the model within 1% accuracy. Model is either furnished by the customer or fabricated in our model shop. No draft allowances are required. Parts may be molded with inserts in accordance with customer specifications.

TYPICAL PARTS

Housing
Mountings
Connectors
Potted Assem.

Cams
Brackets
Containers
Panels

Gears
Levers
Embedments
Lenses

RAPI-CAST PROCESS . . .

A reinforced composition mold is prepared by force casting the precise configuration of the model part. Upon completion of the mold, the required part is cast under moderate pressure to assure detail reproduction. An extensive selection of casting and molding materials is available to satisfy customer requirements.

INQUIRIES INVITED

Please send and indicate the following:

- Model or print of part (indicate if model is available).
- Quantity required and desired delivery schedule.
- Material specification or indicate part application for engineering material recommendation.
